EDUCATION

University of Illinois at Urbana-Champaign Expected Graduation May 2029 *Bachelor of Science in Computer Science*

Thomas Jefferson High School for Science and Technology High School GPA: 4.47/4.00

Related Coursework:

Artificial Intelligence and Machine Learning - Sudoku solver (890 puzzles in 30 secs) etc. using AI/back propagation techniques - predicting the severity of motor vehicle crashes using data.gov dataset - Designed gradient boosted decision trees model and tested on multiple datasets

Robotics and Prototyping - Designed and built air powered engine - Battle bot design and programming

AP Physics C Mechanics & Electricity and Magnetism

Multivariable Calculus and Linear Algebra

TECHNICAL SKILLS

Programming Languages: Java, C++, Python
Frameworks/Tools: Git, Android, iOS
Spoken Languages: English

WORK EXPERIENCE

US Naval Research Laboratories Washington DC *Research Intern* June 2024 – June 2026

• Secondary author of Optics Express Publication: “From Fog Chamber to Aircraft Window: Pixel Registered Imaging and Synthetic Fine-Tuning Enable Cross-Domain Defogging”
• Developed spiking neural networks and pixel to pixel conversions for neuromorphic camera data
• Used python libraries to automate data collection system, including event cameras, frame cameras, and power meters with customizable interface
• Assisted co-workers with technical installations, sensor automation, data collection, and statistical analysis

PROJECT EXPERIENCE

Dalea (React Native) June 2025 – January 2026

• Developed app to correct dance form using Google API based pose analysis and vector comparison
• Attended and presented at the Harvard x MIT Intersections Dance Conference
• Partnered with 12+ dance studios of various styles including Kuchipudi, Bhangra, and ballroom dance
• Awarded alternate finalist in the International Conrad Challenge 2024-25

Printech (Arduino IDE) August 2022 – May 2024

• Surveyed 10+ Fairfax County libraries and ran statistical waste on waste generated by 3D printers
• Designed, wired, and coded prototype shredder and filament generator to recycle 3D printed waste using arduino and custom 3D printed and waterjet components
• Awarded alternate finalist in the International Conrad Challenge 2023-24

EXTRACURRICULAR ACTIVITIES & LEADERSHIP EXPERIENCE

Funbotics Fairfax, VA *DMV Chapter President* August 2023 - June 2026 *DMV Outreach Coordinator* August 2021 - August 2023

• Designed and patented 3D printed masks for frontline workers during COVID-19: Face Mask and Shield combination: Utility patent issued on Utility Patent#: 12484645; USPTO
• Started collaboration with 6+ Fairfax Community Centers and CAF, spanning 1200 students, to host non-profit workshops, teaching underrepresented students 3D printing and robotics
• Designed an FBX remote app to control newly developed Funbotics educational robot through Wifi and facilitate easier introduction for students in STEM
